

Modular Library Series

What's that?

Our Modular Library is a special download edition where you can purchase each of the instruments or groups of instruments separately, easily and quickly by download. After buying the first "module" as a **Virtual Instrument including Kontakt 2 Player and Serial Number**, you can expand this library with other instruments as **Add-Ons** for a reduced price - why pay a second time for a player you already own? An **Add-On** delivers additional sample content but does not include the player, which is always part of the first instrument, you buy.

Please notify: the instruments have to come from the same library and can not be mixed between different Modular Libraries!

e.g. CHB – Chris Hein Bass Library

Full version upgrade?

The purchase of (min.) one download instrument from the Modular Library Series qualifies for an upgrade to the full version (boxed on DVDs) for a reduced price. You can order the upgrade at the Best Service website following the links bellow. There you will find the prices for the upgrades and the payment and shipping terms as well.

Please keep your serial number ready during the order processing.
